

SPEED

- Magnetic Speed with a Snap: JetMag Pro filters allow for rapid installation and removal, thanks to a magnetic design.
- Quick and Comfortable Removal: Equipped with two small handles, these filters can be removed comfortably and quickly.
- Easy Identification: Multi-colored handles help quickly identify different filters in your kit.

STEADY

- Rotate, Lock, and Stability: The patented locking design ensures stability by rotating the small handle to the marked position, securely locking multiple filters in place.
- Multi-Filter Locking: Securely stack and lock multiple filters without compromising stability.

SLIM

- Ultra-Slim Frame for Wide Lenses: Designed to be ultra-slim, JetMag Pro allows the use of two filters on lenses as wide as 15mm without causing vignetting.

VERSATILE

- Adaptable to Various Lenses: Compatible with different filter thread lenses using adapters.
- Protective Metal Lens Caps: Front and back metal lens caps can be quickly installed and removed, offering protection for both filters and lenses.
- Range of Filters for Every Scene: Choose from a variety of filters designed for landscapes, portraits, nightscapes, video, and filmmaking.
- Low-Reflective Nano-Coating: Features a low-reflective nano-coating that effectively reduces glare, even when stacking multiple filters.

About The JetMag Pro Lock

How to Lock JetMag Pro Filters

Single Filter Lock: Install a filter with the handles 45 degrees from the white lines on the adapter. Rotate the small handles until they align with the white lock line. Once aligned, the filter is securely locked and cannot be removed.

Multi Filter Lock: Install multiple filters with the handles 45 degrees from the white lines on the adapters. Align the small handles of each filter frame and rotate them together to match the white lock line on the adapter. When the handles are aligned, the filters are securely locked to each other.

Single Filter Lock

Multi-Filter Lock

Locked Stability

Multi Filter Unlock: Rotate the small handle of the rear filter connected to the adapter 45 degrees from the white lock lines that indicate lock. This will unlock the stacked filters, enabling them to be disassembled together. By rotating the handles of each filter 45 degrees, they will unlock and can be detached.

Multi-Filter Unlock

Installation Tips

Correct Installation

Incorrect Installation
(May cause the incomplete magnetic attached)

JetMag Pro uses a magnetic installation with a locking design. When installing the filter align the handles 45 degrees from the white lock lines on the adapter, then rotate the filter to the lock white lines to firmly lock. For multiple filters, stagger the positions of the small handles on each filter.

How to avoid the vignetting

* The lens used for vignetting test :Canon 15-35 F2.8

It allows two filters used on 15mm without vignetting. To minimize vignetting as much as possible, rotate the small handles to about 45 degrees toward the corners of your composition after installation.

快

咔哒一声，迅如疾风

- 磁吸设计支持快装快拆。
- 外框带两侧小耳朵形状，更方便快速拆卸。
- 外框两侧多种颜色小耳朵，快速识别滤镜种类。

稳

轻轻一旋，稳如泰山

- 专利卡扣设计，旋转至标记位置，支持多片锁紧，坚牢稳固。

薄

轻薄如羽翼，纳天地之广阔

- 超薄镜框设计实现在超广角端无暗角（实现两片叠加在15端无暗角）。

博

博采众长，一应俱全

- 相同口径滤镜系统，通过磁吸转接环可快速安装到不同口径的镜头。
- 前后金属镜头盖支持快装快拆，保护滤镜与镜头。
- 多种功能滤镜，覆盖风光，人像，夜景，视频，电影等多种场景。
- 所有滤镜都采用NiSi研发的低反光纳米镀膜，有效减少叠加滤镜产生的炫光。

安全锁使用说明

滤镜锁定

单片滤镜锁定：将外框小耳朵位置旋转对齐转接环白色线，则滤镜为锁定状态，无法拆卸。

多片滤镜锁定：先对每片滤镜外框小耳朵对齐并旋转对齐转接环白色线（当每片滤镜外框小耳朵位置对齐时，滤镜之间相互也是锁定状态）。

单片滤镜锁定示意

多片滤镜锁定示意

锁定成功示意

滤镜解锁

单片滤镜解锁：将外框小耳朵位置旋转错开转接环白色线，滤镜解锁可拆卸。

多片滤镜解锁：将接触转接环的滤镜外框旋转错开转接环白色线，叠加的滤镜可一次性解锁拆卸（将每片滤镜外框耳朵位置错开，则滤镜之间相互解锁可拆卸）。

单片滤镜解锁示意

滤镜安装

正确安装示意

错误安装示意（可引起安装不牢固）

本产品为磁吸安装并同时有卡扣锁定的设计，请注意安装滤镜时错开卡扣锁定指示区域（转接环白色线位置）。叠加滤镜使用时，将外框小耳朵位置错开。避免落入安全锁卡口位置。

暗角控制 * @15mm 测试使用Canon RF 15-35 F2.8

本产品支持两片叠加无暗角（@15mm）。

为最大程度的避免暗角，建议安装滤镜后将滤镜外框的小耳朵旋转到45度左右位置。
